Organizational Project Management Maturity Model (OPM3) Training Course

Introduction

Introduction

Any organization would benefit from achieving organizational maturity in terms of project management. This implies that projects would be scheduled and planned and tied to the organizational strategy, rather than executed randomly.

Then, what is OPM3? OPM3 stands for Organizational Project Management Maturity Model, a globally acknowledged standard providing tools to measure organizational maturity against a comprehensive set of organizational best practices.

This leads us to wonder—what exactly is project management maturity? Project management maturity is the progressive development of an organization with respect to its project management approach, methodology, strategy, decision making, etc.

Maturity levels vary across organizations depending on specific criteria such as goals, strategies, scope, requirements, etc. Besides OPM3, there are other maturity models available, one of them being the project excellence model (PEM). PEM is a good standard for measuring project success based on an analytical system of points assigned to various categories.

This Xcelerate Training Institute course will empower you with in-depth knowledge and understanding of project management maturity models, specifically OPM3 and PEM.

Through this Organizational Project Management Maturity Model (OPM3) course, you will not only know more about these models but also be able to successfully use them to measure organizational maturity in terms of project management and suggest changes in the project management processes and practices existing within your organization.

Learning Objectives

- in-depth knowledge and understanding of project management maturity of an organization
- the required knowledge, awareness and information of project management maturity models to be able to apply these to project management practices and processes
- the overall confidence, skill and capability to help the organization align project management goals to organizational strategic objectives
- the confidence, experience and information to make changes to project management systems and processes, thereby demonstrating skill and talent to undertake higher roles and responsibilities related to project management
- the skill and experience to manage extremely complex and challenging projects and successfully complete them
- a sense of pride to contribute towards organizational growth and maturity through effective project

management and completion of all projects on time
- the knowledge and exposure to cover all important areas of a project, giving the right attention to the right aspect at the right time
- the required skill, experience and capability to gain credibility as a project management professional thereby increasing avenues for growth and progression

Training Methodology

All courses at Xcelerate Training Institute Talent Solutions are devised to address a specific topic and appeal to the relevant audience in terms of their job profiles and professional experience. Each course is thoroughly reviewed before each training session to check and make changes, if any, to suit the audience.

The trainer ensures trainee participation through group activities and assignments, as well as role-plays. Relevant case studies are also discussed to draw relevance to the training content.

Benefits For Your Organization

- Trained and experienced professionals to handle complex and challenging projects for the organization
