SAP LUMIRA Training Course

Introduction

This Course by Xcelerate Training Institutes is a user-friendly tool enabling analysts and decision-makers to access, modify, and visualize data. Using the LUMIRA desktop, users can prepare data from various sources, create visual representations, and develop interactive reports. These reports can be shared with others through LUMIRA Server and cloud platforms, facilitating collaboration and further analysis. LUMIRA can operate independently or in conjunction with SAP HANA. Initially known as SAP Visual Intelligence, the software was rebranded as SAP LUMIRA in 2012.

Learning Objectives

- Create visualizations and reports from multiple data sources.
- Adapt data to organizational needs for effective storytelling.
- Share insights on platforms like SAP HANA, SAP BO Explorer, and SAP Business Objects BI Platform.
- Predict future trends and make informed decisions.

Training Methodology

This Course typically incorporate a blended learning approach, combining theoretical instruction with hands-on practice. Training modules cover data acquisition, preparation, visualization, and analysis techniques using SAP LUMIRA's intuitive interface. Learners gain proficiency in creating interactive dashboards, reports, and stories that effectively communicate insights from data. Practical exercises and real-world projects solidify understanding and skill development.

Benefits for Your Organisation

SAP LUMIRA empowers your organization by providing intuitive data discovery and visualization tools, enabling business users to independently explore complex datasets, uncover valuable insights, and create interactive dashboards. This fosters data-driven decision-making, improves operational efficiency, and enhances overall business performance.

Benefits for You

This Course by Xcelerate Training Institutes offers a user-friendly interface that empowers business users to explore data, create visualizations, and gain valuable insights without extensive IT expertise. It supports a wide range of data sources, enabling real-time analysis and informed decision-making. Additionally, LUMIRA's mobile accessibility fosters on-the-go insights, while its integration with other SAP solutions streamlines data workflows and enhances collaboration within organizations.

Who Should Attend

The course is designed for application consultants, business analysts, executives, technology consultants, end-users, and developers.

Course Outline

Introduction to SAP LUMIRA

- Getting familiar with the software
- Importing data from different sources
- Data preparation for analysis
- Creating data visualizations
- Sharing insights through reports

LUMIRA for Business Analysts

- Understanding LUMIRA's capabilities
- Data selection from diverse sources
- Creating reports for business decision-making

Data Visualization Techniques

- Creating intuitive visual representations
- Accelerating decision-making with advanced analytics
- Enhancing data with geographic and time-based insights
- Generating calculated metrics
- Data cleaning and formatting

Data Modeling and Analysis

- Combining datasets based on common elements
- Creating complex calculations without coding
- Gaining in-depth business insights
- Effective decision-making using LUMIRA visualizations
- Self-service data access without relying on IT

Advanced LUMIRA Features

- Analyzing and visualizing large datasets
- Core LUMIRA concepts
- Efficient data retrieval
- LUMIRA for operational tasks
- Data acquisition without server configuration
- LUMIRA functionalities

Hands-on with LUMIRA

- Navigating the LUMIRA interface
- Importing, cleaning, and preparing data
- Building visualizations and creating reports
- Data filtering

Data Visualization Customization

- Applying conditional formatting
- Customizing chart properties

- Creating charts directly and using the chart builder

Report Creation and Management

- Designing report layouts
- Filtering data within reports
- Adding, switching, merging, and removing datasets

Data Sharing and Exporting

- Linking datasets
- Saving datasets as files
- Publishing datasets to SAP Explorer
- Exporting reports to PDF
- Sharing charts via email

Data Preparation and Review

- Combining and modifying datasets
- Final data preparation
