Tax Audit

Introduction

Introduction

Taxes are an unavoidable part of being in any kind of business. By understanding how to manage your tax burden and prepare for tax audits, you can maximize your profits over time and reduce the costs of not meeting your legally imposed tax obligations.

The main meaning of the term audit is to check, review, and inspect. Tax audits are a critical part of finance, but they are not purely the responsibility of your CPAs. Audits are collectively championed by consultants, analysts, finance professionals and even by decision-makers who may have limited financial training

This Xcelerate Training Institute course is also designed for managers and business owners who want to understand how tax policies and business structures affect your company, and how prudent tax planning can help you stay organized and financially healthy. Learn how to manage your operations all year-round to avoid last-minute tax muddles.

There are many types of audits under different laws – for instance, company law requires a company audit, and cost accounting law requires a cost audit. For example, if we try to look at the income-tax law, it basically requires the taxpayer to get the audit of the accounts of his business/profession from the viewpoint of income-tax law.

Tax laws provide the obligations relating to the class of taxpayers who are expected to get their accounts audited by a Chartered Accountant. The audit under this section aims to ascertain the compliance of various provisions of the Income-tax Law and the fulfillment of other requirements of the Income-tax Law. The audit conducted by a Chartered Accountant of the taxpayer in fulfillment of the tax law is called a tax audit.

This Xcelerate Training Institute course will empower you with knowledge in the different kinds of audits, from internal and independent audits to the tax audits that are initiated by the government, and reviews of key audit processes.

Learning Objectives

- Learn the definitions of complex tax-related terminology
- Gain a deeper understanding of why tax is levied and what it is used for
- Study the concept of and steps for tax audit preparation
- Identify scenarios in which tax reports and audits may be necessary
- Describe the main goal of tax audits
- Explore how the tax audit space will be impacted by technology
- Identify the best time to prepare for tax audits
- Recognize the idea of tax independence and apply it in a scenario

- Identify the similarities and differences between tax audits and regular audits
