Finance for Non-Finance Managers Training Course

Introduction

Financial knowledge and skills are essential for any managerial position. This training course offers non-financial managers practical experience in understanding and analyzing financial statements, managing costs, performing variance analysis, making informed decisions, and budgeting. The course helps managers enhance their decision-making abilities, ultimately benefiting the company's bottom line.

Financial information provides a clear picture of past events, a basis for forecasting future events, and insights into cost-effectiveness and performance. It helps assess whether objectives and targets have been met and measures comparative performance and profitability.

This Xcelerate Training Institute equips you with the knowledge to make powerful, informed business decisions, covering all major principles of corporate finance, from understanding cash flow to creating corporate value.

Learning Objectives

By the end of this 'Finance for Non-Finance Managers Course,' participants will:

- Use financial information to manage and assess company or departmental operations.
- Manage and reduce costs (fixed versus variable costs).
- Control working capital and manage inventory build-up impacts.
- Apply accounting methods, tools, and techniques to manage financial risks.
- Interpret financial statements and overcome understanding barriers.
- Gain confidence in preparing budgets and reading management information.

Training Methodology

Xcelerate Training Institute customizes each training program to match participants' learning expectations and professional backgrounds. Classroom sessions include presentations by highly competent trainers. Participation is encouraged through group discussions, problem-solving exercises, group activities, and projects. Participants share experiences, issues, and best practices from their organizations, discussed in detail by the facilitator. The course follows the Do–Review–Learn–Apply Model.

Benefits for Your Organisation

Organizations will benefit from:

- Effective communication using common financial language with finance professionals.
- Interpretation of the financial health and state of the company, division, or responsibility center.
- Understanding and computing widely used financial KPIs.
- Applying management accounting techniques for product costing, cost-volume-profit analysis, budgeting, and variance analysis.
- Linking corporate and financial strategy.

Benefits for You

Participants will gain:

- Understanding of financial management functions and their role in business operations.
- Insights into the significance of accounting choices and their impact on financial statements.
- Ability to apply capital budgeting techniques and cost-volume-profit analysis for better decision-making.
- Knowledge of the purpose of the three significant financial statements: Income Statement, Statement of Financial Position, and Cash Flow Statement.

Who Should Attend

This course is ideal for:

- Managers (junior to top-level) needing practical, hands-on experience in corporate finance principles.
