SAP MM (Materials Management) Training Course

Introduction

This Course by Xcelerate Training Institutes is designed to equip participants with the knowledge and skills needed to successfully implement the SAP ERP Materials Management module. The course provides a comprehensive understanding of SAP as an integrated enterprise system that manages core business processes like production, sales, and inventory. Through SAP, businesses gain real-time visibility into their operations, allowing for efficient information flow and management of resources and commitments across different departments.

Learning Objectives

The course aims to provide a comprehensive understanding of industrial business processes and their implementation in SAP. Participants will learn how to apply these concepts to real-world projects and gain a complete overview of the SAP MM implementation lifecycle.

Training Methodology

This Course by Xcelerate Training Institutes typically combine classroom instruction with hands-on exercises in a simulated SAP environment. Instructors cover core concepts like master data management, purchasing processes, inventory management, and invoice verification. Trainees learn to navigate the SAP interface, execute transactions, and troubleshoot common issues. Real-world scenarios are used to reinforce learning, and assessments are conducted to measure knowledge retention and practical skills.

Benefits for Your Organisation

SAP MM streamlines procurement, inventory management, and material planning, optimizing supply chains, reducing costs, and ensuring timely availability of materials. It centralizes master data, automates processes, provides real-time insights, improves decision-making, and enhances vendor relationships, ultimately leading to increased efficiency, reduced risks, and improved overall business performance.

Benefits for You

This Course streamlines material procurement and inventory management by automating purchasing processes, optimizing stock levels, ensuring timely delivery, and centralizing vendor and material data, ultimately improving operational efficiency, reducing costs, and enhancing decision-making through real-time insights and analytics.

Who Should Attend

This course is intended for individuals working in stocks and stores, supply chain management, and vendor acquisition.

Course Outline

Introduction to SAP and Procurement

- Overview of Enterprise Resource Planning (ERP) systems
- Introduction to SAP software and its architecture
- SAP R/3 system architecture
- ASAP implementation methodology
- Procurement process fundamentals

Organizational Setup

- Global settings within SAP
- Configuring company codes for materials management
- Defining plant parameters and purchase organizations
- Assigning plants to purchase organizations
- Creating storage locations and purchase groups

Master Data

- Material group definition
- Vendor master data creation
- Purchasing info record configuration
- Source list setup
- Quote arrangement

Purchase Order Creation

- Request for quotation management
- Quotation processing
- Purchase order creation and types (standard and blanket)
- Automatic purchase order generation

Purchase Requisition and Inventory

- Processing assigned and non-assigned purchase requisitions
