Port and Shipping Management

Introduction

What is Port and Shipping Management?

The management of ports plays a substantial role in managing and controlling transportation cost. It also includes overall delivery time from the source to the last destination and its variability. To this, add freight safety, and reliability of the logistics company, and its throughput.

This Master's program takes a comprehensive approach to shipping, ports, and freight logistics, offering students a solid academic and business-oriented grasp of the whole transport and supply chain needs. This course is updated, as determined by market demands. Our faculty with a unique combination of academic and practice expertise have experience in the shipping, ports, and international logistics industries. They will present a business and research-informed examination of trends and latest developments, technological advancements, and industry practice in these sectors.

What is the port operation process?

The challenges of global trade growth, such as geopolitical shifts and new international regulations, and intense competition are part of the port operation process. Rising demands for environmental, social, and economic sustainability, and climate change adaptation needs and technological evolution prospects, form the backbone of this course.

This course will equip individuals with the knowledge and expertise required to effectively manage shipping operations and ports. Delegates will be able to respond to the overall transport and supply chain needs in this dynamic and complex environment.

Learning Objectives

The main goal of this masterclass is to specifically:

- Provide participants with the most up-to-date procurement operating rules and methods to make project execution easier
- Transform learners into a qualified manager who can take on management and administrative responsibilities in the shipping sector and related industries
- A solid academic and business-oriented global trade knowledge of overall transportation and supply chain requirements, as determined by market demands.
- A deep understanding of trends and the most recent developments, as well as technological advancements and industrial practices
- Deep awareness about the challenges of global trade growth, such as geopolitical changes and new international regulations and the strategies to overcome concerning issues
- Gain a profound knowledge and expertise required to manage shipping operations and ports effectively,
- Grow to adapt to overall transport and supply chain requirements, in this vibrant and complex environment

Training Methodology

The teaching strategy of the program is primarily lecture-based. Additional teaching strategies include:

- Case Analysis
- Group Discussion
- Workshop
- Seminar
- Fieldwork learning

Like all our acclaimed courses, this masterclass in Port and Shipping Management follows the 'Do-Review-Learn-Apply' methodology.

Benefits for Your Organisation

With professionals undergoing this course, organizations will benefit in the ways mentioned below:

- The application of practical and scientific knowledge to port and shipping department managed by trained, experienced professionals
- Ability to identify and articulate marine issues and viable solutions for smooth, Seamless operations
- Development of an inclusive environment where teams can utilize skills and knowledge to produce desired outcomes
- Deep understanding of the importance of ports and shipping in the global logistics supply chain
- A critical examination of goods transported, the types of ships used, and the changes in trade routes due to globalization

- Port ownership models

- Concession agreement
- Ports regulatory framework
- The role of the port authority
- The influence of port ownership on terminals

Marine Operations Management

- Incident investigation
- Safety management systems
- Documentary techniques
- Navigational safety management & policy
- Maritime commercial practice, rules, and limitations

Services Management

- Pilotage services management
- Marine traffic services management
- Maintaining access to the port
- Hydrographic surveys
- Dredging & aids to navigation

Marketing Management Analysis

- Marketing mix
- Marketing concept
- Marketing environment analysis
- The competitive landscape analysis
- Port marketing & business processes

Marketing Management Planning

- Marketing plan
- Marketing research methods
- Finance management & promotional tools
- Buying influences
- Negotiation in marketing

Financial Management

- Port Operations economics
- Financial concepts
- Financial analysis & measurement
- Depreciation & Cost reduction programs
- Funding port development

Operational Management

- Staff management
- Conflict management
- Performance appraisals

- Training & development
- Leadership roles & motivation technique
