Purchasing Strategies and Cost Reduction

Introduction

A common and obvious performance measure of the success of any purchasing department is the amount of money that is saved by the organization. Measurement and evaluation of purchasing performance is extremely necessary for effective management.

How do analytical methods help in improving purchasing performance? Analytical methods measure purchasing performance and provide important feedback to the purchasing department for assessing the effectiveness of the purchasing strategies and decision-making process of an organization.

The overall performance of an organization is significantly affected by how well the purchasing function can contribute to the organization's strategies and goals. Analytical methods thus help in better decision making, communication, visual inspection and motivation.

This training course will empower you with a detailed understanding of how analytical methods used for evaluating purchasing performance also serve as feedback for making amendments to increase purchasing performance.

Considering the importance of purchasing performance, this course will equip you with all information and knowledge necessary to be able to undertake higher roles and responsibilities within your organization and successfully fullfil them, thereby fostering rapid career growth and progression with excellent performance in the relevant field.

Learning Objectives

The main objective of this Purchasing Strategies and Cost Reduction training course is to empower professionals with—

- complete knowledge and information of analytical methods used to evaluate purchasing performance and how they help improve the purchasing performance of an organization
- the necessary knowledge and understanding of advanced analytical tools and methods used to evaluate purchasing performance
- the required skill and confidence to undertake the training of other professionals to help apply analytical tools and methods to assess and improve purchasing performance
- the confidence and experience to conduct regular checks on the methods being used and reports being generated for purchasing performance and thereby making changes to improve the performance, in turn contributing to organisational success
- better decision-making and analytical skills, using all available data and information to make well-informed and correct decisions
- the capabilities to use all data generated regarding purchasing performance to acknowledge and appreciate concerned employees and motivate all to move towards achieving greater success with regard to purchasing performance
- the strategic mindset and perspective to utilize all feedback received to make relevant and beneficial changes and enhancements within the organization, thus demonstrating potential and contributing to

career growth and development

Training Methodology

focuses on a theoretical-cum-practical approach to training. The theoretical part is taken care of through lectures delivered by a highly experienced professional using detailed audio-video presentations for ease of reference.

The content of the training program is reviewed thoroughly before the commencement of a training session to check and make the necessary changes to optimize relevance. Trainee participation is encouraged through group activities and assignments. The practical part is ensured through projects and experiential learning.
